

ternity, but to also be the school's SGA president is another. His workload is enormous I am sure but he somehow manages to keep everything together.

As President of Theta Chi, he is the man responsible for keeping order of the whole brotherhood as well as keeping in touch with our National Headquarters. He also sees to it that any event held, letter sent out, or any proposal made has his seal of approval in order for the fraternity to get the go ahead, thus keeping their standards high.

As President of SGA some of the things he does are sit in on various committees, serve as the student representative to the Board of Visitors as well as conduct weekly SGA meetings every Monday. The biggest issue he has had to tackle so far as SGA President has been the budget crisis with the state and university. As if that is not enough, he has weekly meetings with reporters from the university and community, as well as meeting with administrators about budgetary and student affairs issues.
